Good Apple Award Recipients

Bob McGregor, Supervisor of Data Center, and Debbie Davila, Student Systems Analyst, both District Offices, were recommended for a Good Apple Award by Shelly Kelly, Carol Paul, and Charlene Ammons because of the following: These information data experts always go above and beyond with our requests for help. Whenever we have a data request to get teachers and students up and running we are listened to and most importantly met with patience. This year, in particular, Bob and Debbie have worked with three programs (HMH, IXL, and McGraw Hill) throughout the summer and the beginning of the school year to upload student and teacher files so this content can be accessed online. As our educational world becomes more digitalized, the need for people like these two is paramount. This pair of experts attack each challenge with diligence and work speedily for resolution. Our District is so lucky to have such talented, expert, friendly, and positive people in place to welcome GFPS data requests and concerns with such expertise and efficiency. We would sincerely like these people to know how much we appreciate and value them and their dedication to the District.
